Risk Assessment.

Hazard	Rating	Probability	Whom at risk	Controls
Risk of fall from height.	Very dangerous.	Improbable.	Person climbing.	Use of approved climbing equipment and correctly trained supervision present at all times.
Harness failure.	Dangerous.	Improbable.	Person climbing.	Use of approved climbing harnesses. Inspected and maintained in accordance with manufacturers instructions.
Karabiner failure.	Dangerous.	Improbable.	Person climbing.	Use of self-locking approved karabiners. Inspected and maintained in accordance with manufacturers instructions.
Auto belay failure.	Dangerous.	Improbable.	Person climbing.	The auto belay system is a redundant hydraulic system and in an unlikely event of a failure the system would freeze at its last position.
Structural collapse.	Dangerous.	Improbable.	Any person present.	The climbing wall will not be operated in adverse weather conditions or in winds exceeding 30 mph. In storm conditions the wall is lowered to the ground.
